
Perpetual month graph

Posted by diender - 2011/10/08 10:04

Hi,

I have date

2010-10-02

2010-11-05

2011-01-17

2011-05-03

etc. etc.

Is it possible to create a graph which shows the 'totals per Month' of the past 12 Months?

This month is October. I want to show a graph from October 2010 till October 2011.

Next month: November 2010 till November 2011 etc.

Is this possible?

=====

Hello,

Is data stored in a CSV file or a database? Could you provide a sample CSV file or SQL dump?

Regards,
ARI Soft

Is data stored in a CSV file or a database? Could you provide a sample CSV file or SQL dump?

The data is stored in a SQL database. I want to use one field: created. It has this output '2011-10-05 19:55:31'. Every new record get a new timestamp. I want to show in a graph the amount of records created per month.

Try to use the next SQL query:

```
SELECT
*
FROM
tbl
WHERE
created > (SELECT CURDATE() - INTERVAL 1 YEAR - INTERVAL (DAYOFMONTH(CURDATE()) - 1) DAY)
```
