
Data Filter

Posted by pkjoshi - 2011/10/12 20:10

I would like a filter box(dropdown field) in the search Bar above the column heading, which have selectable values

example like in your demo

there is a theme type selector.

Another example is like in joomla admin - there are dropdown field with values to filter the data. How I can do that.
(Snapshot attached)

Hello,

Sorry, but the extension doesn't support described ability.

Thank you for your prompt response.

but the client for whom I have bought your add-on insists on that. Can you give me any idea, how I can add that feature by using any plugin or custom coding etc.

For example you can extend "ARI Data Table" table widget. It uses DataTables jQuery plugin and this plugin supports ability to extend functionality with help addons.
