## Date Format

Posted by jackfeliciano - 2011/10/27 04:52

---

I am sorry if I am doing something stupid, but I have tried everything by now...

My problem is: I don't seem to manage a way to make columns in the "date" format properly sorted. Although they indeed become sortable, they are sorted as regular numeric fields, not dates... the result is that 21-05-2010 comes after 15-11-2011 (ascending) - apparently just because the number "day" is higher...

Is there anything I can do to make it work:???

Hello,

Specify please what table widget you use.

Thanks for the fast reply...

Well, although all of them have the same problem, I am using ARI DATA TABLE in CSV mode right now.

... and starting to get desperate here!

Could you provide a link to a page where we can see the problem?

Yes, sure...

Access this link: [table](#)

dates in the format: dd/mm/yyyy

Thanks

The widget can sort dates in mm/dd/YYYY format. For this set "ARI Data Table -> Columns settings -> Column index" parameter to 1 and "ARI Data Table -> Columns settings -> Sorting type" to Date value.
