## Header is different & Paging not working in Chrome

Posted by gorden - 2011/11/12 00:03

---

<http://staging.powergatellc.com/open-frame-power-supplies.html>

First look at the table in Firefox or IE and then you'll notice that the table is supposed to be the one color of blue, but in Chrome, the header row is grey and the paging function does not work.

I am using Joomla 1.6.5, Ari Data Tables version 1.5.24 and using Yootheme's Enterprise template.

I'll pm you the access info so you can take a look.

Thanks,

Gorden

Paging is working, I was just not clicking in the right area, but the header is still an issue in Chrome only, looks great in other browsers.

Hello,

Clean browser's cache and try again please. The problem occurred because Aristo theme was modified, but specific Google Chrome styles (-webkit prefix) was not modified.

Regards,  
ARI Soft
