
how to indroduce a links?

Posted by linpi - 2011/11/15 21:19

hi,
how to introduce a links in the csv file, so the name (label) of the link showing but the whole link?

I put this code in cell my csv
"News"

What is showing is the whole link and not just "News".
How to to that?

I use J! 1.7.3 & Ari Data Table 1.5.30

Thanks

Hello,

Could you send your CSV file and screenshot(s) of module settings page by email?

Regards,
ARI Soft

Your mail provider blocks letters from our primary mailbox. Find updated CSV file in attach please. If you set "Recognize links" parameter for the last column to "Yes" in "Columns settings" parameters section, change it to "No".
