
CSV File upload and path

Posted by cnewell - 2011/11/17 18:21

How do I upload a .csv file to my site?

Then how do I know what to enter in the -Path to csv file- Box?

Hello,

You can use a file manager extension like eXtplorer to upload CSV files. If you CSV file is located by the next path /images/data/my_file.csv , enter in "CSV Path" parameter the next value:

images/data/my_file.csv

I downloaded that file manager

I tried using the path from images/memo.csv it didn't work.

I tried copying /home/content/72/8515072/html/images from the files part of the media manager then adding /memo.csv to the end.

Every combination I try just dissappears when I click save on the module.

Check that "System - ARI Extensions" plugin is installed and enabled. This fact is described in readme.txt file from extension's archive.

Got the system plugin and the content were installed but they weren't published now its working.

Thank you very much
