
How to fix white text on white background?

Posted by BFTA - 2011/12/01 16:12

Help... :lol:

Complete novice!

Running Joomla 1.7 at www.thebfta.net with the JA Purity II template

Have installed ok, and built a page at <http://thebfta.net/test-grading> which is all working fine except for one thing... the text at the top of the columns is white, on a white background.

How can I fix this? I'm very inexperienced so a copy paste and exact instructions where for me to place it would be so great.

Thank you very much.

Hello,

Open module settings page and add the next code to "CSS Styles" parameter:

```
TABLE.display THEAD TR TH
{
  color: #000;
}
```

Regards,
ARI Soft
