
Colors, backgrounds, fonts, and arrows

Posted by omegawar - 2011/12/02 14:56

hello! I am looking to change the color of my table and I found the following link that was very helpfull.

<http://www.ari-soft.com/ARI-Data-Tables/9731-Changing-Theme-Colors.html>

My question is, how to I change the top header background image/color and make the font bold.

I would also like to change the arrow images. I am using the 'blacktie' jQuery UI Theme.

Hello,

You can add new jQuery UI theme, this process is described on module settings page. See "How to create and add new jQuery UI theme?" section. Link to help file can be found in "Description" field on module settings.

Regards,
ARI Soft
