
How to query from serialized data in table column?

Posted by tatomixes - 2011/12/02 22:58

I need to know how to query data from serialized column:
a:1:{i:0;a:11:{s:10:"tipster_id";s:1:"1";s:6:"league";s:9:"England F";s:9:"opap_code";s:3:"HAB";s:7:"kickoff";s:8:"12-12-11";s:8:"hometeam";s:10:"Manchester";s:9:"rivalteam";s:10:"Birmingham";s:8:"prognosi";s:2:"12";s:7:"apodosi";s:2:"12";s:6:"booker";s:1:"1";s:11:"final_score";s:2:"12";s:7:"outcome";s:1:"1";}}

This is my query

```
SELECT `serialized_data` FROM jos_tipster_deltio WHERE `id`=" AND `tipster_id`=" AND `league`=" AND `opap_code`=" AND `kickoff`=" AND `hometeam`=" AND `rivalteam`=" AND `prognosi`=" AND `apodosi`=" AND `booker`=" AND `final_score`=" AND `outcome`="
```

The idea is to show "England",HAB etc, but Im only geting error:JDatabaseMySQL::query: 1054 - Unknown column 'league' in 'where clause' SQL=SELECT `serialized_data` FROM jos_tipster_deltio WHERE `id`=" AND `tipster_id`=" AND `league`=" AND `opap_code`=" AND `kickoff`=" AND `hometeam`=" AND `rivalteam`=" AND `prognosi`=" AND `apodosi`=" AND `booker`=" AND `final_score`=" AND `outcome`="

Cheers-Tato

Hello,

"WHERE" clause can contain only columns from tables, in your case from jos_tipster_deltio table. It is not possible to select data by PHP serialized value.

Regards,
ARI Soft
