## row styling - can't find css for odd,even

Posted by treb - 2012/02/10 16:49

---

Hello, I am running ari data tables 1.5.32 testing on j1.7, hope to go to j2.5 v soon.

I have Advanced styling =yes but no styling appears for odd, even rows. This works oK with an earlier version on my j1.5 site, although I can't see the css file for the module there either. makes reading wide rows, some with wrapped column content, much harder! I have tried to set all the parameters in the newer one to be the same as the older one.

Thanks

Hello,

Could you provide screenshot(s) of module settings page and a link to a page where we can see a table?

Regards,  
ARI Soft

old,j1.5 styled table: <http://www.lowemissionzones.eu/emission-standards-table/by-start-date-othermenu-46>

new, unstyled table: <http://lowemissionzones.eu/jupgrade/lez-quick-guide/by-start-date>  
- pagination not the same styling etc either

attached two .png shots of the newer params- enough visible?  
Thanks

---

Table on provided page contains "odd" and "even" CSS class in element.

If you want to use jQuery UI theme, set "Choose table type -> ARI Data Table -> Using jQuery UI Themes" parameter to "Yes".

with respect, neither table has even or odd in the , but ari-tbl-row-0 thru ari-tbl-row-305

but the setting of Using jQuery UI Themes WAS what I needed. Thank you!
