Can not find Menu Option? - Joomla 2.5

Posted by hosker4u - 2012/02/10 22:37

_____

Im new to Joomla 2.5, so may be a silly question.

I just purchased ARI Data Tables and have installed and activated System - ARI Extensions, Content - ARI Data Tables and ARI Data Tables.

Yet I can not seem to find it anywhere on the Administrator Control Panel?
Theirs no mention of ARI never mind ability to create a table.

_____

Hello,

"ARI Data Tables" is a module and you can find in "Extensions -> Module Manager" page on Joomla! backend.

Regards,
ARI Soft

Ahh its starting to make sense.

Now that I have this modual, the settings are to the right. So I can get it to load a SQL query or CSV file. I have no idea how to do that, but will hope to find out on forums now I know where to look.

How about, if I want more than one ARI DATA TABLE?
Can I keep adding the modual? for more "tables"?

_____

Joomla! supports ability to create as many module instances as you wish. You can read about it here. Information how to use the extension can be found in "Description" field on module settings page.
