
Installing & Using Ari Data Vizualizer

Posted by mjarrett - 2012/02/11 14:27

I downloaded Ari Data vizualizer .I have the following queries :

- 1) How do I install it ? I tried installing through Joomla installer but it gave error (" no XML file ")
2. Does it only work with html tables ie cannot work with data residing in csv files or SQL database ?

thanks

Hello,

Unzip plugin archive and read readme.txt file please. It contains instructions how to install the plugin. It is possible to wrap with the plugin "ARI CSV Table" or "ARI SQL Table" plugins.

Regards,
ARI Soft
