Posted by Pavel Svarc - 2012/02/20 14:34

:(

We installed Joomla 2.5

I installed the packages:

mod_aridatatables.zip

plg_content_aridatatables.zip

plg_system_ariextensions.zip

I enabled the plugin ARI

I enabled the ARI modules

I'm going to edit articles and this appears to me. What should I do?

Everything I have purchased official.

Hello,

Download the extension from "Member Area" again and upgrade "ARI Data Tables" module and "Content - ARI Data Tables" plugin. It should help.

Regards,
ARI Soft
