jQuery is undefined
Posted by jasonjcyr - 2012/03/03 18:45

_____

I turned on site compression with rockettheme gzip.
and I get the error 'jQuery' is undefined

Object doesn't support this property method

this is my link

_____

Hello,

This problem with RokGZipper plugin. It can't handle external javascript files properly.

Set "Load jQuery method" parameter to "Local copy" in "ARI Data Tables" module settings. It should help.

Regards,
ARI Soft
