
Data no available.

Posted by Dotty - 2012/03/04 06:06

I'm trying to work with a simple 4 column CSV file using the module. I am getting this displayed on my site "No data available. "

Attached is how I have my CSV settings in the module. <http://www.ari-soft.com/images/fbfiles/images/Capture-f8426251c74eb37a79ec3dc3f4bc76d3.jpg>

I'm using J2.5 and RocketTheme Clarion template. Here's a link to my site ... see bottom of page http://sipcity.com.au/sipcnew/index.php?option=com_content&view=article&id=1&Itemid=108

Any idea why I cannot see my table?

Thanks

Hello,

Try now please. Incorrect path to the CSV file was used.

Regards,
ARI Soft

Sorry, I have changed something on the site before I saw your message, so may have "broken" this again.

Can you please let me know what the correct path is that I should be using? That way I can make the update myself and know for future use.

Many thanks.

Set it to media/docs/IntlRateCard.csv instead of sipcnew/media/docs/IntlRateCard.csv

That's interesting, because I tried that URL and it didn't work. I tried many combinations ;-)

Thanks!
