Echo ARI Data Table
Posted by trevor_stp - 2012/03/05 16:57

_____

Is it possible to echo an ari data table with a code similar to the following

Thanks

Trevor

_____

Hello,

Where do you use this code?

Regards,
ARI Soft

_____

If you use "Content - ARI Data Tables" plugin it is possible to use this code into an article. It is necessary to set correct order in plugin settings page so the plugin executes after a plugin which is used to embed PHP code into articles.

_____

Thanks for the great support.

After changing the order of the plugins and changing 'POST' to 'GET' in the code, I am able to echo various ari datatable modules in the content area dependant on php variables.
