
jQuery UI Conflict with Ari Data Table

Posted by trevor_stp - 2012/03/05 22:44

Is it possible to avoid the conflict with ARI data tables (Module settings: Conflict set to "no", use JQuery themes set to "yes") when using jquery UI

Thanks

- TAB 1

- TAB 2

- TAB 3

{aridatatables moduleId="141"}

Tab 2 content

Tab 3 content

```
jQuery.noConflict();
$(function() {
  $( "#tabs" ).tabs({
    ajaxOptions: {
      error: function( xhr, status, index, anchor ) {
        $( anchor.hash ).html(
          "Couldn't load this tab. We'll try to fix this as soon as possible. " +
          "If this wouldn't be a demo." );
      }
    }
  });
});
```

Hello,

Could you provide a link to a page where we can see a problem?

Regards,
ARI Soft
