# About \"System - ARI Extensions\" plugin

Posted by casimir - 2012/03/09 20:38

---

Hi,

About this note in the readme file

Note: Skip this notice if you use Joomla! 1.5. If you want to install "ARI Data Tables" on Joomla! 1.6, at first install "System - ARI Extensions" plugin using plg\_system\_ariextensions.zip archive. It requires that provides ability to use enhanced UI for configuring modules and plugins created by ARI Soft company. The extension will not work without "System - ARI Extensions" plugin.

I have Joomla 2.5

In the readme you say.

Skip ARI-Extension if you use Joomla 1.5

Install first ARI-Extension if you use Joomla 1.6

What I must do if I have Joomla 2.5 ?

I have installed

1. Install 'ARI Data Datables' module using mod\_aridatatables.zip file, enable and configure it.

2. Install 'Content - ARI Data Tables' plugin using plg\_content\_aridatatables.zip file if you want to use 'ARI Data Tables' in Joomla! articles.

It doesn't work!

Hi,

Maybe modify the readme file

If you want to install "ARI Data Tables" on Joomla! 1.6,

by

If you want to install "ARI Data Tables" on Joomla! version 1.6 and more,

Thank you

Hello,

"System - ARI Extensions" plugin is required for Joomla! 1.6+ (including 2.5). We will update readme.txt file.

If something doesn't work, could you provide a link to a page where we can see a problem and screenshot(s) of module settings page by email?

Regards,  
ARI Soft
