
About display table result in article

Posted by casimir - 2012/03/11 04:29

In Article, I doesn't see the table result when I use this script

```
{arijtablesorter paging="true"}
{arisqltable}
{arisqltablequery}
SELECT ID
FROM jos_content
{/arisqltablequery}
{/arisqltable}
{/arijtablesorter}
```

For your information :

A) Plugins are enabled

B) I have plain editor without HTML

In article, I see the table result when I use this script

```
{aridatatables moduleId="90"}{/aridatatables}
```

Surely, I made a mistake, but I doesn't see the problem.

Thank you,

Benoit L.

Hello,

The first code for "ARI Smart Content" extension, not for "ARI Data Tables".

Regards,
ARI Soft
