## Change hyperlink text colour

Posted by pmarks - 2012/03/12 11:49

---

How do I change the colour of hyperlink text in a column please?

Hello,

Do you want to change color for all links in a specific column? Could you provide a link to a page where we can see a table and specify what color do you want to change?

I'd like to change the colour of all the hyperlinks in the Stock column - [http://www.sp-test.stockpinger.com/index.php?option=com\\_content&view=article&id=171#dailyrisers](http://www.sp-test.stockpinger.com/index.php?option=com_content&view=article&id=171#dailyrisers)

to colour - #0000ff please.

Add the next code to "CSS Styles" parameter in module settings:

```
{ $id } TR TD.ari-tbl-col-0 A
{
  color: #0000ff;
}
```

Thanks Guys.

You don't happen to have a list of tweaks like this, do you please?

If "Advanced styling" parameter is set to "Yes", each column and row have unique CSS class and it can be used to add necessary styles.

Hye,

I have not bought the Ari Data Table yet but I am very interested to. For it, I just need to know if it is possible to insert weblinks in the tables (not column title, just some datas in teh table) with a CSV import for instance.  
In this case, is it possible to create the link inside Excel and the word (with its link) will be directly inserted in the table, that's it ????

Thanks.  
Sergio

Hello,

In CSV files possible to use a HTML code to store links:

Link

or possible to store only links (for example <http://www.domain.com>) and configure the module to convert them to hyperlinks.
