ARI Data Tables for Dummies

Posted by studebaker1925 - 2012/03/14 12:57

_____

I am having trouble getting started, most probably because I am a prime example of a Dummy. Is there a "Doing ARI Data Tables for Dummies" resource? What I would find helpful would be for you to provide an example CSV file, instructions what to do with it, instructions on how to set up the Module/Plug-in etc., instructions how to get a table into an existing or new article. Basically, a proven step by step guide.

All the reviews sing their praises on this package, but I can't get beyond installing the modules/plug-ins.

_____

Instructions how to use the module can be found in "Description" field on module settings page. Each module parameter contains description which appears in a tooltip for a parameter label.

Instructions how to use "Content - ARI Data Tables" plugin can be found on plugin settings page. In brief, if you want to show "ARI Data Tables" with ID equals to 45 into an article, check that the module is enabled and use the next code into an article:

{aridatatables moduleId="45"}{/aridatatables}

Regards,
ARI Soft
