
ARI Data Table SQL Statment Like \'%text%\' How?

Posted by adam.singer - 2012/03/30 15:56

How can I do a like statment in the SQL code and have it work?

For example: select * from Users where FirstName like '%Adam%'

Hello,

Sorry, but what the problem with your SQL query? It looks fine.

Regards,
ARI Soft

It's not working with the Request variables for example this doesn't work properly

select * from Users WHERE Position like '%{\$REQUEST:Position}%'

Use the next SQL query:

```
SELECT
*
FROM
Users
WHERE
Position LIKE CONCAT('%', {$REQUEST:Position}, '%')
```
