## Static row number

Posted by pszemyk - 2012/06/15 00:10

---

Hi,  
Sorry for poor English.  
How can i add column with static row number.  
I want to put static row count (ordinal number) in one column.  
In the remaining columns will be data from the SQL database.

Thanks in advance

Hello,

You can use user-defined variables. A sample SQL query:

```
SELECT
  @rownum:=@rownum+1 AS position,
  id,
  title
FROM
  (SELECT @rownum:=0) AS pos,
  #__content
```
