sql query on table
Posted by mhubaut - 2012/06/26 15:27

_____

i have install your module, i tried a simple list from joomla table users
but when i write the sql query
"select * from jmla_users "
after save the module when reopen no sql query !!!
i dont understand why
i have put colum i want for list
id name username
i have tried whidth from 'jmla_users'
same problem
i have tried the query with phpmyadmin
two test one with ari data table
one with ari tiny table
same problem sql not writen in module
thanks for help

_____

Hello,

Check that "System - ARI Extensions" plugin is installed and enabled. This fact is described in readme.txt file from
aridatatables_unzip_first.zip archive.

Regards,
ARI Soft
