Please help me to start with ARI Data Table
Posted by jutarut - 2012/07/03 20:59
_____

Dear Sir,
I have no knowledge about SQL query.
Please help me to start with ARI Data Table
I would like to create table and line graph for data as the attached file.
Please give me some advice to setting your module.
Best Regards,
Jutarut C. http://www.ari-soft.com/images/fbfiles/files/weather_db1.zip

_____

Hello,

What data do you want to show in a table and in a graph? Could you provide an image where we can see table and graph?

Regards,
ARI Soft

_____

Dear sir,
Sorry for late reply.
I would like to show data in table and chart as showing the attached pictures.
Thank you very much for your support.
Best Regards,
jutarut C. http://www.ari-soft.com/images/fbfiles/files/picture-12deba413ecf0458e027d3e6085a23f7.zip

_____

Create two "ARI Data Table" module instances.

Configure the first instance in the next way:

  jQuery UI Theme = lefrog

  Choose table type = ARI Data Table

  Choose source type = SQL

  Choose source type -> SQL -> SQL query =

SELECT
 datetime AS `Date-Time`,
 temp AS `Temperature`,
 rain AS `Rain`,
 direct AS `Wind Direction`,
 speed AS `Wind Speed`,
 humi AS `Humidity`,
 batt AS `Battery`

FROM
 mote_data1
ORDER BY
 datetime DESC

The second instance configure in the following way:

  Choose table type = ARI GChart

  Choose table type -> ARI GChart -> Type = Line Chart

  Choose source type = SQL

  Choose source type -> SQL -> SQL query =

SELECT
 datetime AS `Date-Time`,
 temp AS `Temperature`,
 rain AS `Rain`,
 speed AS `Wind Speed`,
 humi AS `Humidity`
FROM
 mote_data1
ORDER BY
 datetime DESC

  Choose source type -> SQL -> Revert data = Yes

Regards,
ARI Soft
