
No data available.

Posted by serhiox - 2012/07/24 13:31

Hello,

I've installed 2 plugins + module ARI DATA TABLE and enabled them.

I put ddd.csv file into "images" directory, selected in "Choose source type" - CSV, wrote in "Path to CSV file" - /images/ddd.CSV.

my web site

on a page it is written NO DATA AVAILABLE

What did i do wrong?

P.S. maybe there are some video tutorials?

Hello,

Set path parameter to images/ddd.CSV values (remove leading / symbol).

Regards,
ARI Soft

thanks, now it is working.

Please tell me how many products can be in a table?

I have around 50,000 unique names, will it work?

The module works properly with about 2500 records.
