
Article title link

Posted by ivo75 - 2012/08/02 14:47

with this SQL string I get article title

```
SELECT title
FROM #__content
WHERE catid =17
```

Can I use this title as link to article?

Hello,

Use the next SQL query:

```
SELECT id, title
FROM #__content
WHERE catid =17
```

Set "Columns settings -> ID" parameter to id value and set "Columns settings -> Hidden" to "Yes".

Set "Columns settings -> ID" parameter to title value and "Columns settings -> Format" parameter to the next value:

{ \$value }

Regards,
ARI Soft
