[SOLVED] align_right not working!

Posted by JugglingReferee - 2012/10/12 14:28

_____

In CSS Styles -> CSS Styles, I have this code:

{$id} TR TD.align_right,
{$id} TR TH.align_right {
  font-family: CribOEM8513;
  font-size: large;
  text-align: right;
}

The URL that runs this module is {link removed by author} and the columns that have Column Settings -> CSS Class set to align_right are the non-text columns: Rank, Games, Game Pts, Games Won, Net Pts, and + Pts.

As you can see, the fields are not right justified!

Any ideas?

_____

Hello,

We don't see the problem:

_____

I am looking to have the columns names right justified:

Rank, Games, Game Pts, Games Won, Net Pts, and + Pts

_____

Also: even though I flagged this module to not support sorting, is it true that the space in the header cell, where the sorting arrows would normally be, is not available to be used by the header text.

That is, when the column names do become right justified, they are still restricted from being displayed all the way to the right of the cell, almost as if there is a hidden right border?

_____

Add the following code:

{$id} TR TH.align_right DIV {

```
  text-align: right;
}
```

Hmm, that one didn't seem to work. The code I have in the CSS Styles section is:

```
@font-face {
  font-family: CribOEM8513;
  src: url('/Fonts/CribOEM8513.eot?') format('eot'),  url('/Fonts/CribOEM8513.ttf') format('truetype');
}

{$id} TR TD.align_right,
{$id} TR TH.align_right {
  font-family: CribOEM8513;
  font-size: large;
  text-align: right;
}

{$id} TR TH.align_right DIV {
  text-align: right;
}

{$id} TR TD.align_left,
{$id} TR TH.align_left {
  font-family: CribOEM8513;
  font-size: large;
}
```

Re:align_right not working!
_____

Sorry, use the following code instead of previous one:

```
{$id}_wrapper TR TH.align_right DIV {
text-align: right;
}
```

_____

That did seem to work, thank you! Nice work again.

When I use Chrome or FF, it doesn't line up 100% exactly. I will add a padding-right to the cells that contain data.

_____

I do believe that some space is taken up by the not-present sorting arrows, as found in message #32729 on the first page.

_____

You can use the following code:

```
{$id}_wrapper TR TH.align_right DIV
{
 padding-right: 0;
}
```

but if the table will contain sortable columns it can cause the problem, sorting arrows will not be shown.
