## Responsive

Posted by pk2kpitaes - 2012/10/22 19:03

---

Hello,

I am using ari data tables in a responsive website. The problem I have is that when I display the page from a notebook or from a tablet the table is out of the page.

How I can fix this?

Thank you very much.

Regards

Hello,

Do you want to hide part of table? Where we can see the table on your site?

Hello,

The webpage is under construction yet.  
What I need is that the table will automatically resize it to the page width.

Thank you

The module doesn't support this ability. Possible solution add scrolling to container element.
