No style or function
Posted by jeffisrael - 2012/10/27 22:03

_____

OK, I'm using the ARI Data table model to publish some data from MySQL. The data displays fine, but it has no styling or function apparently. It's set to a width of 100% but only stretches a few hundred pixels. It was set up to be a an ARI Table Sorter but has no sorting options/functionality. I have attached a picture of what it looks like on the front end.

_____

Hello,

Could you provide a link to a page where we can see the problem?

Regards,
ARI Soft

_____

It seems this is a problem with a 3rd party extension because javascript which loads the module is not included into the page. Could you provide a temporary access to your J! backend by email so we can investigate the problem in more details?

Regards,
ARI Soft
