## Header font

Posted by adoewa - 2012/10/31 09:21

---

Hi all,

How can i make the headerfont smaller?

Hello,

Where we can see a table?

The header with contains always the place for the sorting arrow, even if it's disabled.  
I want to make all my columns the same width.  
I think it's possible by making the font smaller.

Do you want to change font size for all header columns or for specific columns?

Use the following CSS rule:

TABLE.dataTable THEAD TH

---

```
{  
font-size: 10px;  
}
```

You can add it to "CSS Styles" parameter in module settings.
