hy.

i use ari data for a long time , and fotgot how to show a picture

i have this columns headers-

1.name ( text)

2.picture ( link )

what is the format ?

where i put it ?

do i need to open a new Columns ?

what is the Columns settings ?

....?

thaks

Ariel

Hello,

If path to image is stored in table field, set "Columns settings -> ID" parameter to column name and "Columns settings -> Format" to the following value:

Regards,

ARI Soft
