Compound WHERE Clause in Ari Data Tables?
Posted by tmediacom - 2013/01/30 04:05

_____

Hello
I am using ARI Data Tables and in SQL query section I have:

SELECT
CompanyName, WEB
FROM sheet4
WHERE City = {$REQUEST:City}
    AND
    cuisine = {$REQUEST:cuisine}
    AND
    price = {$REQUEST:price}

Unfortunately, it doesn't work. Is it possible to have compound where clause such as one above?

Thanking you in advance for your assistance.

_____

Could you provide a link to a page where we can see a problem?

Regards,
ARI Soft

_____

Hi -

Thanks for your response, the link you requested is as follows:

http://palmsprings-mobile.com/index.php/portfolio/video-portfolio

The full query in the SQL section of Data Tables is:

SELECT
CompanyName, City, WEB
FROM sheet4
WHERE City = {$REQUEST:City}
AND
cuisine = {$REQUEST:cuisine}
AND
price = {$REQUEST:price}

_____

Hello,

Use the following SQL query:

SELECT

```
CompanyName,
City,
WEB
FROM
sheet4
WHERE
({$REQUEST:City|empty:''} = '' OR City = {$REQUEST:City|empty:''})
AND
({$REQUEST:Cuisine|empty:''} = '' OR cuisine = {$REQUEST:Cuisine|empty:''})
AND
({$REQUEST:Price Range|empty:''} = '' OR price = {$REQUEST:Price Range|empty:''})
```
