
(solved) Where is documentation - Data Tables?

Posted by BussupARI - 2013/05/30 00:18

I purchased this product and installed it.

I can not see any documentation on this. It says it is in the modules/plugins, but I don't see it.

Where can I get documentation on how to get started making tables?

Also, is it possible to export a table into googledocs? I want to create a table for viewing but I also need to get the data to someone else using googledocs (not Excel). Is there a way to do that other than copy and paste?

Thanks

Hello,

Documentation is available in "Description" section on module settings page. See the screenshot below for more details:

<http://www.ari-soft.com/images/fbfiles/images/dt-fc6f14b36c643488fc1a757079405512.jpg>

The extension doesn't export data to Google Docs. "ARI Data Table" can export data to CSV. For this set "Choose table type -> ARI Data Table -> Show export buttons" parameter to "Yes".

Regards,
ARI Soft
