
Update tables

Posted by betherton - 2013/08/23 13:03

I love this module and currently have it importing CSV files and it works great.

I need users to be able to update the tables. If I put the tables in SQL, is there an easy way to get a form for the admin to easily update the tables?

My problem is that keeping the CSV files up to date is going to be a problem.

Hello,

The extension doesn't support ability to update tables. Possible solution upload your CSV file to Google Docs and update data via Google Docs and share data from Google Docs in CSV format and link to CSV file on Google Docs in "ARI Data Tables" module settings.

I love that idea and I set up a test one to try it out. I am not sure how to link it. When I use the SHARE link from google docs it doesn't work out quite right. What am I doing wrong?

Hello, i think about to buy "ARI Data Tables" and my intension is to take data from a csv file "hosted" on Google Docs/Drive.

But the csv file must be changed/updated often. And i don't know how it is possible to edit csv file on google docs. I can

only convert it in google format oder i can download , edit an upoad the csv file.

Is it possibel to edit the csv file directly. Also on android phone?

Greetings from Germany!

Hello,

You can edit data on Google Docs service and then all changes will be shown on Joomla! site (after about 10 minutes). It is possible to create a link to document from Google CSV format which will contain actual data from Google Docs.

Yes. I know this.

admin wrote:

How can i edit data on Google Docs service?

I tried to change a csv-file on Google Docs, but it is not possible.

I can only convert the file in Google spreadsheet format to edit. But i need a csv-file for ARI Date Tables, or?

And i can download the csv-file from Google docs, edit and upload it again. But this is not what i need.

I want to edit the csv-file directly in Google Docs. On PC, tablet and android phone.

Is it possible?

Thanks
dirmel

Edit Google Docs spreadsheet and use a link to the spreadsheet in CSV format for "ARI Data Tables" extension.

Ah. OK. Now i understand. I will try it. Thank you!

But one more question:

Is it possible sorting date in german format ("31.12.2013") with Data Tables?

So. I have purchased and installed "ARI Smart Content" (not ARI Data Tables).

Here ist the spreadsheet on Google Docs:

<https://docs.google.com/spreadsheets/d/16cZGo1pAKSmG8kG-IZ8z9rO-e-MpV5ctpsuiMD8qL6U/edit?usp=sharing>

What ist the code to bring the table in my Joomla Website?

something like this?

```
{arijdatatable}
{aricsvtable file="???"}
{/aricsvtable}
{/arijdatatable}
```

Regards

Re:Update tables

Posted by admin - 2014/07/18 09:42

Sorry, but this thread is about "ARI Data Tables" extension and this extension supports ability to work with remote CSV files. "ARI Smart Content" currently doesn't support this ability.

Link to Google Docs document in CSV format looks like:

<https://docs.google.com/spreadsheets/d/DOCID/export?format=csv>

Where DOCID is document ID. In your case document ID is 16cZGo1pAKSmG8kG-IZ8z9rO-e-MpV5ctpsuiMD8qL6U and link will look like:

<https://docs.google.com/spreadsheets/d/16cZGo1pAKSmG8kG-IZ8z9rO-e-MpV5ctpsuiMD8qL6U/export?format=csv>

Don't forget to share document using "Share" option for the document on Google Docs service.

Re:Update tables

Posted by dirmel - 2014/07/18 09:56

Oh... It ist not possible with ARI Smart Content? But it includes ARI JCSV2Table, ARI CSV Table , ARI JDataTable... I

though that ist the same as ARI Data Tables... and some other plugins more...

Can i change it? I paid 35 Dollar :-(((I need the possibility to work with remote csv files...

Or do i have to pay another 15 Dollar?

Please help me.

Regards
dirmel

Re:Update tables

Posted by admin - 2014/07/18 09:58

We can add this ability to "ARI Smart Content", but it requires 2 working days or if you want to change the extension contact us by email.

Regards,
ARI Soft

I can wait two working days. I think this is the best solution - also for other users from "ARI Smart Content"...

Thank You very much!

Regards
dirmel

Re:Update tables

Posted by admin - 2014/07/18 14:19

Download and upgrade the extension. After this you can use the following plugin code to show data from Google Docs spreadsheet:

```
{aricsvtable file="https://docs.google.com/spreadsheets/d/16cZGo1pAKSmG8kG-lZ8z9rO-e-MpV5ctpsuiMD8qL6U/export?format=csv"}{/aricsvtable}
```

Regards,
ARI Soft
