
jquery column filter field width

Posted by arvis - 2013/10/03 12:54

Hi,

I have installed the jquery.dataTables.columnFilter.js and modified the files and multi filtering on the datatable works.

But I just can not change the width of the filtering fields in the footer. They all have the same width and overrule the width of the datatable.

Thanks in advance,

Arvis

Hello,

Is it possible to see the problem?

Regards,
ARI Soft

Hello,

Here's a screenshot...

Thanks! <http://www.ari-soft.com/images/fbfiles/images/table-0bb67e97043b8d9c2ca65509d38d64ce.jpg>

We can't investigate the problem by a screenshot. Send a link to a page where we can see the problem.

Hi,

Found the solution here ...

<http://code.google.com/p/jquery-datatables-column-filter/issues/detail?id=126>

"ARI Data Tables" extension doesn't support "Column filter" addon for DataTables jQuery plugin. It can be added manually, but investigating of any issue with this plugin is out of free support.
