
Ari J data table header

Posted by dodu.petrescu - 2014/03/24 12:15

Hi,

I am using ari j data tables . My sql looks like this:

```
{arijdatatable bPaginate="true"} {aristable} {aristablecolumns} {aristablecolumn id="functie" alias="Functie"
className="idg"} {aristablecolumn id="nume" alias="Nume" headerClassName="head"} {aristablecolumn id="incad"
alias="Inc" headerClassName="head"} {aristablecolumn id="disc" alias="Disciplina" headerClassName="head"}
{aristablecolumn id="dept" alias="Departament" headerClassName="head"} {aristablecolumn alias="Virtual Column"
headerClassName="head" virtual="true" pos="1"} {/aristablecolumn} {/aristablecolumns} {aristablequery} SELECT
functie AS Functie, nume AS Nume, incad AS Inc, disc AS Disciplina, dept as Departament from #__state_mg where
disc like'Disciplina Biofizica%' {/aristablequery}{/aristable}{/arijdatatable}
```

I have 2 questions:

- 1.How can all the column tiles be in line. If you can look at the attach you can see the column named Inc is a bit lower than the rest
- 2.How can I fix the pcre.limit error for a big table

thank you <http://www.ari-soft.com/images/fbfiles/images/headarij.jpg>

Hello,

1. Could you provide a link to a page where we can see the table?
2. What is "pcre.limit" error?

Regards,
ARI Soft

1. Add the following CSS rule to "CSS Template" or to a site template CSS file:

```
BODY table.display thead th {
white-space: nowrap;
}
```

2. You can try PHP Settings plugin to override value of "pcre.backtrack_limit" PHP parameter.

-
1. thank you but now the sort button goes over the text
 2. I will try

regards

-
1. Add also the following CSS rule:

```
BODY table.display thead th.actCell_2 {  
  min-width: 70px;  
}
```

Regards,
ARI Soft

Thank you so much. It works.
Great Support!
