
[SOLVED] 404: Not Found

Posted by Krx - 2014/03/30 11:46

Hi

I wanted to give link to Ari Data Tables to one potential subscriber,
but it seems that link below doesn't work:

<http://www.ari-soft.com/Joomla-Components/ARI-Data-Tables/index.php>

404: Not Found

Sorry, but the content you requested could not be found

This is default link from your Products page.

Can you investigate?

Regards

Hello,

Default link is it and works fine.

PS: Could you specify where you find the link from your post?

Regards,
ARI Soft

Hi

Hmm weird..

I got that link from clicking your Products page than clicking Arti Data Tables link.

In FireFox I had this problem. I tried different browser and link worked OK.
Than I cleared ARI related cookies in FF and link was still broken.

Than I logged out and link worked OK. After logging back in, links works OK.

Maybe problem was because of combo of old ARI website cookies and FF session.

Anyway now it works OK, sorry for false alarm :cheer:

Regards
