
Data table from a user

Posted by remcovandeberkt - 2014/04/02 08:47

Hi,

I use rsforms pro and i want to make a table/graph from the submissions of the logged user.

I have a form where automatic the userid is stored, as a Fieldname-> FieldValue

what I want to show is the following:

Sort on the submitted date in the form, the submitted distance of a specific Form of the logged user

See in the below code:

submitted date -> 'Datum'

submitted distance -> 'Afstand'

specific Form - FormId = 1

User id can be found at 'Userrnr' this is the same number of the Joomla UserId

I hope you understand what i mean

Hello,

You can read here how to show data for "RS Form" using "ARI Data Tables" module.

Regards,
ARI Soft

Re:Data table from a user

Posted by remcovandeberkt - 2014/04/02 09:21

Yes i found that to,

But how can replace SubmissionId for the UserId from the logged user and only show his submitted form values

Re:Data table from a user

Posted by admin - 2014/04/02 09:44

Are user IDs stored separately for submissions, for example in jos_rsform_submissions table?

Regards,
ARI Soft

Re:Data table from a user

Posted by admin - 2014/04/02 10:18

Use the following SQL query:

```
SELECT
SV.SubmissionId,
SV.FieldName,
SV.FieldValue
FROM
#__rsform_submission_values SV INNER JOIN #__rsform_submissions S
ON SV.SubmissionId = S.SubmissionId
WHERE
SV.FormId = 1 AND S.UserId = {$UserId}
ORDER BY SV.SubmissionId DESC, SV.FieldName ASC
```

Regards,
ARI Soft

Re:Data table from a user

Posted by remcovandeberkt - 2014/04/02 12:34

A thank you, this is on the good way.

Is it also possible to have on the x axis the date (FileName-> Datum)
and on the y axis the distance (Filename-> Afstand)

and then connect the dots from the distance value

something like this

<http://www.ari-soft.com/images/fbfiles/images/graph-0863570d8cc238f2b760cfe08622e06f.png>

Re:Data table from a user

Posted by admin - 2014/04/02 15:45

It is not possible for data from "#__rsform_submission_values" table. It will be possible if "Datum" and "Afstand" will be saved in separate column in a table. You can contact "RS Form" developers and ask probably a 3rd party extension provides this ability.

Re:Data table from a user

Posted by remcovandeberkt - 2014/04/03 12:56

Oke thank you.

I get it now and solved it with a extra colomn in the values table true sql mapping from RSforms pro

I used the following SQL query

<http://www.ari-soft.com/images/fbfiles/images/sql.png>

SV.Datum is a additional colomn which RSforms fills with the 'Datum' value

Re:Data table from a user

Posted by remcovandeberkt - 2014/04/03 12:57

the result

<http://www.ari-soft.com/images/fbfiles/images/result.png>

Thank you for your help
