
Problems Printing Data Tables

Posted by challforever - 2014/04/10 15:28

Hello. First off, ARI Data Tables is a fantastic product, and makes my job substantially easier and more efficient, so thank you for that.

My issue is when I try to print a Data table using the print button, in Firefox, only two pages will print, and the second page has nothing but the column headings and no data. The table should be 3 1/2 pages. I can tell this because it prints out fine in Chrome. One other odd thing, when I print out the full table in Chrome, the second, third, and fourth pages don't have the column header on each page like the page that prints out in Firefox.

Please assist.

Thanks!
Chris

Thank you. Could you send a link to a page where we can see the problem so we can investigate it?

Regards,
ARI Soft
