
Language setting on the frontend

Posted by Sue1688 - 2014/04/14 12:25

Hi expert,

I edited the language file of en_UK.txt to translate "Showing _ to _ of _ entries" from English to Traditional Chinese. However nothing's changed on the frontend after uploading.

How can I correctly change the default language setting of the frontend ?

Please Help.

Thanks & regards,

Sue Lin

Hello,

See "Choose table type -> ARI Data Table -> Info label" parameter in module settings.

Hello,

I followed your instruction to set "Info label" parameter in Chinese. However, it doesn't work to process "Showing _to_of_entries" . Please take a look at http://www.rabe-taiwan.com/lohas-events/health-events.html#.U1EwY_mSzv8.

Also, How can I simply change the background colors of row and page labels ?

Have a nice weekend ~

Regards,

Sue Lin

Hello,

What value do you use for "Info label" parameter?

Could you also provide an image where we can see what background you want to change?

Hello,

I'd like to change the background colors of table header/even rows/page labels (pls refer to the attachment). Please kindly advise how (or where) to change the color setting.

As for "Info label" parameter, now nothing's wrong with it. It works very well in Chinese status.

Thanks & regards,

Add the following CSS rules to "CSS Styles" parameter in module settings:

```
TABLE.dataTable THEAD TH {  
  background-color: #7FD6FF;  
}
```

```
TABLE.dataTable TBODY TR.odd TD {  
  background-color: #FFF;  
}
```

```
TABLE.dataTable TBODY TR.even TD {  
  background-color: #FAFAFA;  
}
```

```
DIV.dataTables_paginate A.paginate_button {  
  background-color: #FAFAFA;  
}
```
