## step by step manual - german language

Posted by koebi - 2014/04/15 04:41

---

I looked allover around but could not find a step by step manual of Data Tables for greenhorns like me :( Further it would be very helpful to get manual or support in german language. Many thanks in advance for any hints :)

Hello,

Tutorial is available in "Description" section on module settings page. Click by "Detailed help here" link and it appears into a lightbox.

Regards,  
ARI Soft

Where can I find a tutorial on this module and its application in articles? The link "Detailed help here" available on module settings page does not explain how to use it.

I just bought the ARI Sexy Lightbox module, but no manual or instructions for how to use it is provided in the zip file! :-(

Hello,

Documentation for "ARI Sexy Lightbox" is available here.

Regards,  
ARI Soft

Thank you very much for your quick response :-)

Despite my research, I cant configure the Sexy Lightbox module. This module and all its plugins are published. The thumbnail appears correctly in the article, but clicking on the images they open as a single link, not as a Lightbox.

I just need an example like the one you have on <http://www.demo2.ari-soft.com/ari-sexy-lightbox.html>, with shadow theme that opens into the same article that I created.

Can you give me the basic settings, please?

Thanks in advance.

Do you want to use the module (configure settings on module settings page and load module instance into an article) or plugin (place plugin code into an article)? Want to show images from specific folder(s) on your server?

I prefer to show images from specific folder located on my server, placing plugin code into the article.

Install "ARI Sexy Lightbox" then install "System - ARI Sexy Lightbox Anywhere" plugin. Open plugin settings and set "Load jQuery Method" parameter to "Local copy", "Choose type" parameter to "Image gallery" and "Choose type -> Image gallery -> Layout type" parameter to "Simple gallery" value. Don't forget to enable the plugin and save plugin settings.

For example If you want to show images from /images/album folder, add the following plugin code to an article:

```
{arisexylightbox activeType="imglist" dir="images/album" thumbWidth="100"}{/arisexylightbox}
```

Ooops! It still does not work.

- ARI Sexy Lightbox: installed
- ARI Sexy Lightbox Anywhere: installed
- Load jQuery Method: Local copy
- Type: Image gallery
- Layout: Simple gallery
- Enabled
- Saved
- Code {arisexylightbox activeType="imglist" dir="images/template/my\_gallery" thumbWidth="100"}{/arisexylightbox} added to the article.

Now thumb is showed two time into the article, and images still opens without lightbox.

It can be a conflict with a 3rd party extension. Could you provide a link to a page where the problem occurs and a temporary access to your J! backend by email so we can investigate the problem in more details?

Again, thanks for your help. Now it works perfectly!

Great support! :-D
