
Numeric field sort when formatted in EU currency

Posted by mauromi - 2014/06/30 00:04

Hello,
I formatted one column of my table as {\$value|number_format:2;,:.} in order to show currency data in EU format, like 1.234.456,97.

The problem is that I cannot get this column sorted. I tried all the possible values (Numeric, Numeric HTML and Numeric Advanced) in table type -> ARI Data Table -> Columns settings -> Sorting type, but they all do not work.

Here attached is what I get, for example, if I choose "Numeric HTML".

Thank you

Hello,

I have the same problem, could you please forward me that email, or write solution here.

Thank you
