Error search box

Posted by rera.marco - 2014/07/09 16:15
_____

Hello everyone,

I have a big problem. After the upgrade of Joomla, in my article the tables that i have created with ari data tables doesn't work like before. The tables should be with the search box and 10 rows, but now i see all the rows without the search box.

What can i do?

Thanks a lot!

Hello,

Send your order number by email please and a link to a page where we can see the problem.

Regards,
ARI Soft

It is not "ARI Data Tables" issue. This problem with an extensions which you use to load the module into the popup. Only

HTML content of the module is loaded without , and tags. Javascript, CSS files and javascript code are not loaded.
