
ARI table sorter and search box

Posted by ttt_kailit - 2014/07/10 19:08

Hello,
I am still using ARI table sorter and load data from .csv. It takes too long time to load data. Is it possible to add pre-text in search box to minimise table loading time. Web page user can change to later (if he wants)?
Thanks.

Hello,

It is possible for "ARI Data Table" widget. See "Choose table type -> ARI Data Table -> Default search string" parameter.

Regards,
ARI Soft
