
Exports DB not saving as Excel

Posted by zanni - 2014/07/27 01:41

Hi,

I have successfully set up Ari Tables to show registration dates and account creation dates, however, when I export the the DB files as Excel they save as .csv files. It seems I can only export as.csv.

Is there some setting I'm missing?

Thanks, D. Ashley

Hello,

The extension exports data to CSV format, but it is supported by MS Excel application.

Regards,
ARI Soft
