
ARI Data Table - Abnormal Style

Posted by Sue1688 - 2014/08/08 04:06

Hi,

Two modules of my ARI Data Tables show abnormal format on frontend (after Joomla 2.5.24 installation).

Please kindly give me some advice. Thanks in advance.

Regards,

Sue Lin

Hello,

If you want to use a jQuery UI theme, set "Choose table type -> ARI Data Table -> Using jQuery UI themes" parameter to "Yes" and choose a theme in "jQuery UI Theme" drop-down.

Hello admin,

Thanks for your reply.

I do use your jQuery UI themes. The keypoint is I use same parameters to set 3 modules of ARI Data Tables. Only one module can show normal format on frontend, the others show abnormal formats on frontend.

- 1). ARI Data Tables - Normal format
- 2). ARI Data Tables - Abnormal format

If nothing wrong with my setting, does it mean I can't use more than 1 module of ARI Data Tables at same time ?!

Please confirm.

Regards,

Sue Lin http://www.ari-soft.com/images/fbfiles/images/Abnormal_ARI_Data_Table____Backend_Setting_1.jpg

Check our previous post please. We wrote about "Choose table type -> ARI Data Table -> Using jQuery UI themes" parameter. If it doesn't help, could you provide a temporary access to your J! backend by email so we can investigate the problem in more details?

Regards,
ARI Soft
