
Sort column with numbers with ARI Tiny Table

Posted by dinant@dtwm.nl - 2014/08/14 16:43

Is it possible to sort a column in numeric order with ARI Tiny Table?

=====

Hello,

"ARI Tiny Table" widget is based on TinyTable script and it is try to detect column type automatically, but if you want to define a column type, it is possible to use "ARI Data Table" widget and define it in "ARI Data Table -> Columns settings -> Sorting type" parameter.

Regards,
ARI Soft

Hello,

Ok, I understand.
Thanks for your help.

Regards,
Dinant
