Hello,

It is available in "Description" section on module settings page. The parameters also contain tooltips with description.

I can not get this module to work. I have a csv file that I have uploaded to my website. Everytime I type the name (images/atest.csv) into the field on the Ari module and then hit save, it is no longer there immediately after the module saves. Why is this happening

Hello,

Check that "System - ARI Extensions" plugin is installed and enabled.
