
ARI Data Tables - adding IMAGES and URL and more

Posted by ptou - 2014/08/20 18:07

Hi,

Is it possible to add images (assuming they are stored as url in the database) in a column of the table?
Is it possible to add clickable URL (to redirect to pages with parameters)?
Is it possible to add custom things (like a progress bar)?

Thank you for your help!

Hello,

It is possible to convert links to HTML hyperlinks (or images).

Regards,
ARI Soft

Can you explain on how to do this?

Thank you.

For example if "PageLink" column contains links they can be converted to HTML hyperlinks using "Column settings -> Format" parameter. For this set "Columns settings -> ID" parameter to PageLink value and populate "Columns settings -> Format" parameter with the following value:

Link

If "ProductImage" column contains links to images, set "Columns settings -> ID" parameter to ProductImage value and populate "Columns settings -> Format" parameter with the following value:
